**1. Please indicate, based on your personal knowledge and experience, if the following goals form the 2002-2007 SCORP have been met and are still valid state goals for implementation of the LWCF program.**

Goals	Status			Remains Valid	
	Met	Partial	Not Met	Yes	No
To revise and update the 1995 State Comprehensive Outdoor Recreation Plan.					
To reassess existing public and selected private sector recreational resources in Alabama.					
To reassess selected recreation activity participation rates by race, gender, age and income.					
Revise Alabama's wetlands plan.					
To identify recreation activity needs by regional planning district.					
Review Alabama's outdoor recreation planning standards.					
To identify recreation resource base issues and develop an action/implementation program.					
To develop an LWCF acquisition/development project selection mechanism incorporating the recommendations contained in the SCORP assessment and policy plan.					

**2. Please indicate if you feel that the following should remain as high, moderate or low priorities in the State's implementation of the LWCF program.**

	High	Moderate	Low
Acquisition of urban open space including land for greenways or other linear or connecting park lands.			
Acquisition of unique natural resources areas such as wetlands, saltwater beach, urban waterfront, National Natural Landmarks, and state designated unique natural or scenic areas that are capable of sustaining light to moderate recreation use.			
Abandoned railroad rights of way.			
Acquisition of park land in incorporated areas where there are no recreation facilities.			
Passive or unstructured outdoor recreation facilities in areas where the existing supply does not adequately address existing resident and non-resident demand.			
Saltwater beach access areas and support facilities.			
Projects where handicap access is the primary objective. For example, bank or pier fishing areas, playgrounds, interpretive trails, etc.			
Development of walking, bicycling, hiking, and ATV/ORV trails.			
Water access areas for canoeing and rafting.			
Renovation of existing facilities that have deteriorated because of age or overuse. Facilities that have not been adequately maintained are ineligible for assistance.			
Age appropriate playgrounds.			

**3. What do you feel should be the State's outdoor recreational priority in the implementation of the LWCF program?**

**4. What do you feel is the greatest outdoor recreational need across the State?**

**5. What do you feel is the greatest recreational issue to be addressed in the provision of outdoor recreation facilities and opportunities?**

**6. What do you feel is the most significant barrier to citizen participation in outdoor recreation activities?**

**7. Please use the back of this page to provide other comments on items that you feel have not been addressed.**
